Costa Mesa, CA | (818) 207-6963 | ianaltemustech@gmail.com | [linkedin.com/in/ian-altemus-cloud](https://www.linkedin.com/in/ian-altemus-cloud) | github.com/ian-altemus-cloud | silverlinkai.com

PROFESSIONAL SUMMARY

Cloud Infrastructure and Kubernetes Engineer with production experience building AI SaaS systems across AWS and Azure. Specializes in Kubernetes platforms, DevSecOps pipelines, multi-account cloud architecture, and event-driven AI infrastructure. Proven track record operating production systems under real customer load with strong emphasis on reliability, security, and operational discipline. Treats every system as if failure has consequences, because it does.

PROFESSIONAL EXPERIENCE

Cloud Infrastructure Engineer | SilverLink AI Jan 2024 – Present

- Architect and operate a multi-tenant AI SaaS platform on AWS automating Instagram DM workflows for local service businesses. Lead engineer across infrastructure, backend services, CI/CD, observability, and AI systems.
- Reduced DM response time from 6 hours to under 30 seconds. Achieved 27% DM-to-booking conversion rate across live production clients.
- Developed an agentic booking pipeline using Playwright and Claude tool-calling: detects booking intent, navigates live booking systems, delivers availability and booking links via Instagram DM. End-to-end validated in production.
- Designed the AI orchestration layer with XML-structured prompts, intent routing, persona locking, edge-case handling, and conversation memory across a multi-tenant architecture with KMS-backed credential isolation.
- Deployed event-driven AWS infrastructure using ECS Fargate, SQS, DynamoDB, API Gateway, Terraform, and GitHub Actions OIDC with HMAC webhook validation and zero long-lived credentials.
- Executed an end-to-end AWS account migration under active production load and compressed timelines, successfully migrating networking, compute, messaging, identity, and API infrastructure with zero downtime.

Technology Lead and Managing Partner | Secretive Nail Bar | Newport Bch, Beverly Hills, Santa Monica Feb 2019 – Present

- Co-founded and scaled premium multi-location service business to 23% revenue growth. Owned all technology decisions, operational systems, and P&L across three locations.
- Served as primary incident commander across all locations, applying structured root cause analysis and systems thinking to operational disruptions under pressure.

Realtor and Loan Officer | Platinum Real Estate Group May 2013 – Aug 2018

- Managed high-stakes compliance-driven financial transactions requiring strict accuracy, documentation standards, and auditability under regulatory oversight.

TECHNICAL PROJECTS

Trendlink (Enterprise Multi-Account AWS and Kubernetes Platform)

- Architected a multi-account AWS environment with hub-and-spoke networking, Transit Gateway routing, SCP enforcement, RAM sharing, and segmented three-tier VPC architecture with bastion host and private compute subnets.
- Engineered a Kubernetes platform on EC2 private subnets using ArgoCD GitOps, Helm, Calico network policies, RBAC, ingress routing, and workload scheduling controls. Delivered the Prospect Agent end-to-end with Flask, Google Places API integration, automated DevSecOps pipelines, and Vault-based secrets injection.
- Implemented a DevSecOps pipeline with Checkov SAST, Trivy image scanning, GitHub Actions OIDC, automated ECR pushes, ArgoCD synchronization, and Vault sidecar injection to eliminate Kubernetes Secrets for sensitive values.

Azure Infrastructure (Bicep IaC, AKS, Zero Trust Architecture)

- Deployed production Azure environment via Bicep: VNet, subnets, NAT Gateway, ACA environment, NSG, Managed Identity, Key Vault with RBAC role assignment. Zero Trust architecture with private endpoints and managed identities.
- AKS architecture: pods, services, Ingress, health probes, blue-green deployments with traffic shifting and connection draining. GitHub Actions OIDC with managed identity auth to Key Vault. Azure Monitor and Application Insights observability.

TECHNICAL SKILLS

- **Kubernetes and Containers:** Kubernetes, EKS/AKS, kubectl, Helm, ArgoCD, Calico CNI, Network Policies, RBAC, Ingress Controllers, Docker, ECS Fargate
- **Cloud and IaC:** Terraform (modular structure, S3 backend, DynamoDB state lock, multi-account provider aliases, OIDC auth), AWS (ECS Fargate, SQS, API Gateway, Lambda, DynamoDB, EventBridge, IAM, CloudWatch, Secrets Manager, KMS, S3, ALB, VPC, ECR, ACM, Transit Gateway, AWS Organizations, RAM, SCPs), Azure (ACA, Key Vault, Managed Identity, Bicep)
- **DevSecOps and CI/CD:** GitHub Actions (OIDC), Jenkins, Checkov SAST, Trivy, HashiCorp Vault, GitOps, Two-Repo Architecture, Zero Trust Pipeline Design
- **AI and Automation:** Anthropic Claude API, AWS Bedrock, Claude Tool-Calling, Agentic Pipeline Design, Playwright, Intent Routing, Multi-Tenant AI Architecture, Event-Driven Systems
- **Observability:** Prometheus, Grafana, CloudWatch, Azure Monitor, Application Insights
- **Languages:** Python (Flask, boto3), Bash, Git, Ansible
- **Security:** IAM Least-Privilege, KMS Encryption, Vault Secrets Injection, HMAC Webhook Verification, Zero Trust, Managed Identity, Private Endpoints, Calico Network Policies

EDUCATION AND CERTIFICATIONS

B.S. Cloud Computing and IT Network Engineering | Western Governors University | Anticipated June 2026

AWS Certified Solutions Architect – Associate • HashiCorp Terraform Associate • Google Cybersecurity Certificate
